

Mehmet Nasim Yılmaz

Full-Stack Developer

Istanbul | +90 544 173 48 73 | mehmetnasim42@gmail.com | linkedin.com/in/menasy | github.com/menasy | menasy.me

SUMMARY

I have 4 years of experience in software development. I have developed projects in different areas, especially web technologies and mobile programming. I continue to learn modern technologies and improve myself. You can review my portfolio for all projects and details. I would be pleased to take part in a position where I can contribute to your company with my knowledge and experience. Thank you for your consideration.

EXPERIENCE

Baykar Technology - Central Control Software Intern

October 2025 – December 2025

- I developed a full-stack live streaming platform running on media servers and worked on video streaming processes.
- Technologies:** ASP.NET Core, React, Web API, Wowza Streaming Engine, WebRTC, HLS, MPEG-DASH.

42 Istanbul - Software Engineer

October 2023 - October 2025

- I developed 15+ projects in system programming, network technologies, web development and full-stack solutions.
- Technologies:** C, C++, Multi-threading, Socket Programming, Microservices, TypeScript, Fastify, React, Git, Docker.

Paka Technology - System Support Intern

August 2024 - September 2024

- I took an active role in internal IT infrastructure and hardware/software support processes.
- Technologies:** System Administration, IT Infrastructure, Technical Support, Troubleshooting.

Tencent Holdings Limited - Server Technician

April 2023 - May 2023

- As part of a 3-person team, we handled server installation, rack mounting and network cabling processes.
- Technologies:** Server Installation, Data Center Operations, Hardware Installation, Network Configuration.

PROJECTS

eSIMbag - Digital eSIM Purchase Platform

- A web application that offers purchase and SSE-based eSIM management for 8 regional and 195 country packages.
- Technologies:** Next.js, TypeScript, TanStack Query, Zustand, Stripe, Tailwind CSS, Turborepo, i18n.

StreamApp - Live Streaming and Media Management Platform

- A media platform developed for stream management and archiving processes with support for 3 different protocols.
- Technologies:** .NET, React, Wowza Streaming Engine, RBAC, SignalR, WebRTC, HLS, PostgreSQL, Docker.

ft_transcendence - Real-Time Game Platform

- A real-time game, tournament and social interaction platform developed with a 5-service microservices architecture.
- Technologies:** TypeScript, Fastify, WebSocket, Web Components, Nginx, Docker, Microservices, i18n, OAuth 2.0.

WebServ - HTTP/1.1 Web Server

- A CGI-supported server designed from scratch, managing connections concurrently with event-driven architecture.
- Technologies:** C++, Socket Programming, I/O Multiplexing (poll/select), CGI, POSIX API.

Inception - Microservices Infrastructure Management

- Secure configuration of a 3-service Docker Compose infrastructure consisting of Nginx, WordPress and MariaDB.
- Technologies:** Docker, Docker Compose, Nginx, MariaDB, WordPress, Bash Script, TLS/SSL, Alpine Linux.

Akilli Rehber - Accessibility-Focused Mobile Application

- An accessible mobile application published on Google Play, offering voice command and large visual support.
- Technologies:** React Native, Expo, TypeScript, Zustand, MMKV, Fuse.js, Google Play Store.

HesKit - Business Management System

- A financial solution application supporting 3 core processes: shift tracking, payments and personnel management.
- Technologies:** Java, SQLite, Room Database, Android SDK.

SKILLS

Programming Languages – C (Expert), TypeScript (Advanced), JavaScript (Advanced), C# (Advanced), C++ (Intermediate), Java (Intermediate), Kotlin (Intermediate), SQL (Intermediate), HTML/CSS (Intermediate), Bash (Basic), Python (Basic).

Backend Technologies – ASP.NET Core, Node.js, .NET Web API, Fastify, REST API, Entity Framework, JWT, WebSocket.

Frontend Technologies – React, Next.js, Tailwind CSS, SSR, i18n, TanStack Query, Zustand, Redux.

Mobile Technologies – React Native, Expo, Android SDK, Android Jetpack, Room Database.

Databases – PostgreSQL, SQLite, Redis, Firebase, Supabase, Cloud Firestore.

DevOps & Infrastructure – Docker, Docker Compose, Nginx, CI/CD, Linux, TLS/SSL, Reverse Proxy.

Monitoring & Logging – Grafana, Loki, Alloy, Serilog, ELK Stack.

System & Network Programming – Socket Programming, Multi-threading, Multi-process, HTTP/1.1, TCP/IP, POSIX.

Software Architecture & Principles – Microservices, MVC, Onion Architecture, OOP, Clean Code.

Tools & Platforms – Git, GitHub, Postman, Visual Studio Code, Android Studio.

EDUCATION

Istanbul Gelisim University - Management Information Systems

2021 - 2025

- Received comprehensive education focused on software development, database management, network systems and information technology processes, combining technical knowledge with business needs. Gained practical competence in software projects, system analysis and modern development methodologies.
