

# Mehmet Nasim Yilmaz

## Full-Stack Developer

Gaziosmanpasa, Turkey | +90-544-173-48-73 | [mehmetnasim42@gmail.com](mailto:mehmetnasim42@gmail.com) | [linkedin/in/menasy](https://www.linkedin.com/in/menasy) | [github/menasy](https://github.com/menasy) | [menasy.me](https://menasy.me)

## EXPERIENCE

### Baykar Technology - Central Control Software Intern

October 2025 – December 2025

- Engineered a full-stack live streaming platform running on media servers to orchestrate video streaming processes using 3 protocols.
- Technologies:** ASP.NET Core, React, Web API, Wowza Streaming Engine, WebRTC, HLS, MPEG-DASH.

### 42 Istanbul - Software Engineer

October 2024 – October 2025

- Delivered over 15+ projects in the areas of system programming, network, web development, and full-stack solutions.
- Technologies:** C, C++, Multithreading, Socket Programming, Microservices, TypeScript, Fastify, React, Git, Docker.

### Paka Technology - Systems Support Intern

August 2024 - September 2024

- Managed an average of 50+ IT support requests per week, resolving computer hardware and software issues.
- Technologies:** Systems Administration, IT Infrastructure, Technical Support, Troubleshooting.

### Tencent Holdings Limited - Server Technician

April 2023 - May 2023

- As part of a 3-person team, I carried out data center server installations, rack cabinet assembly, and network cabling processes.
- Technologies:** Server Installation, Data Center Operations, Hardware Assembly, Network Configuration.

## PROJECTS

### eSIMbag - Digital eSIM Purchase Platform - [esimbag.com](https://esimbag.com)

- A global B2C platform with multilingual support enabling users to purchase and configure regional data packages and global eSIM profiles.
- Technologies:** Next.js, TypeScript, TanStack Query, Zustand, Stripe, Tailwind CSS, Turborepo, i18n.

### StreamApp - Live Streaming and Media Management Platform

- Engineered a live streaming platform archiving real-time video with low latency: WebRTC (~0.0s), MPEG-DASH (~7.4s), and HLS (~31.9s).
- Technologies:** .NET, React, Wowza Streaming Engine, RBAC, SignalR, WebRTC, HLS, MPEG-DASH, PostgreSQL, Docker.

### KobiAI - AI-Based Business Management System - [GitHub](https://github.com)

- An operational platform that manages product, inventory, and customer processes for medium-sized businesses (SMEs) with AI support.
- Technologies:** Python, FastAPI, PostgreSQL, Redis, Google Gemini, Next.js, TypeScript, Zustand, SSE, Docker Compose.

### ft\_transcendence - Real-Time Gaming Platform - [GitHub](https://github.com)

- A real-time gaming, tournament, and social interaction platform implemented using a 5-service microservices architecture.
- Technologies:** TypeScript, Fastify, WebSocket, Web Components, Nginx, Docker, Microservices, i18n, OAuth 2.0.

### WebServ - HTTP/1.1 Web Server - [GitHub](https://github.com)

- A server designed from scratch with CGI, using an event-driven and non-blocking architecture to handle connections concurrently.
- Technologies:** C++, Socket Programming, I/O Multiplexing (poll/select), CGI, POSIX API.

### Inception - Microservice Infrastructure Management - [GitHub](https://github.com)

- Secure configuration of a 3-service Docker Compose infrastructure consisting of Nginx, WordPress, and MariaDB.
- Technologies:** Docker, Docker Compose, Nginx, MariaDB, WordPress, Bash Script, TLS/SSL, Alpine Linux.

### Smart Guide - Accessibility-Focused Mobile App - [GitHub](https://github.com) - [Play Store](https://play.google.com/store/apps/details?id=com.menasy.smartguide)

- Developed and published an accessible mobile guide app on Google Play featuring voice commands, a large UI, and 3-language support.
- Technologies:** React Native, Expo, TypeScript, MMKV, Fuse.js, Speech Recognition, Contacts API, i18n.

## EDUCATION

### Artificial Intelligence and Technology Academy - Artificial Intelligence Module

2025 - 2026

- Project-based training is provided on artificial intelligence-focused application development. Students gain hands-on proficiency in Python/FastAPI, generative AI, LLM systems, API integrations, and AI agent approaches.

### Istanbul Gelisim University - Management Information Systems - GANO: 3.47 / 4.00

2021 - 2025

- Completed a comprehensive education program focused on software development, database management, network systems, and information technology processes, combining technical knowledge with business needs.

## SKILLS

### Languages

- English:** Intermediate (B1) – **Turkish:** Native.

### Technical Skills

- Programming Languages:** C, TypeScript, JavaScript, C#, C++, Java, Kotlin, SQL, Python.
- Backend Technologies:** ASP.NET Core, Node.js, .NET Web API, Fastify, REST API, Entity Framework Core, JWT Authentication/Authorization, WebSocket, OAuth 2.0, RBAC, SignalR, FastAPI.
- Frontend Technologies:** React, Next.js, Tailwind CSS, SSR, i18n, TanStack Query, Zustand, Redux.
- Mobile Technologies:** React Native, Expo, Android SDK, Android Jetpack, Room Database.
- Databases:** PostgreSQL, SQLite, Redis, Firebase, Supabase, Cloud Firestore.
- DevOps and Infrastructure:** Docker, Docker Compose, Nginx, CI/CD, Linux, TLS/SSL, Reverse Proxy.
- Monitoring and Log Management:** Grafana, Loki, Alloy, Serilog, ELK Stack.
- System and Network Programming:** Socket Programming, Multi-threading, Multi-process, HTTP/1.1, TCP/IP.
- Software Architecture and Principles:** Microservices, MVC, Onion Architecture, OOP, Clean Code.
- Tools and Platforms:** Git, GitHub, Postman, Visual Studio Code, Android Studio, Antigravity IDE.
