

Mehmet Nasim Yilmaz

Full-Stack Developer

Gaziosmanpasa, Turkey | +90-544-173-48-73 | mehmetnasim42@gmail.com | linkedin/in/menasy | github/menasy | menasy.me

EXPERIENCE

Baykar Technologies - Central Control Software Intern

October 2025 – December 2025

- Developed and integrated a live streaming platform managing broadcast workflows across 3 protocols: WebRTC, HLS, and MPEG-DASH.
- Technologies:** ASP.NET Core, React, Web API, Wowza Streaming Engine, PostgreSQL, Docker, SignalR, RBAC, RabbitMQ, Grafana, Loki, Serilog.

Paka Technologies - System Support Intern

August 2024 - September 2024

- Resolved computer hardware and software issues by managing an average of 50+ weekly IT support tickets.
- Technologies:** System Administration, IT Infrastructure, Technical Support, Troubleshooting.

Tencent Holdings Limited - Server Technician

April 2023 - May 2023

- Performed data center server installations, rack cabinet assembly, and network cabling as part of a 3 person team.
- Technologies:** Server Installation, Data Center Operations, Hardware Assembly, Network Configuration.

PROJECTS

eSIMbag - Digital eSIM Purchasing Platform - esimbag.com

- A multilingual global B2C platform enabling users to purchase regional data packages and global eSIM profiles.
- Technologies:** Next.js, TypeScript, TanStack Query, Zustand, Stripe, Tailwind CSS, Turborepo, i18n.

StreamApp - Live Streaming and Media Management Platform - [Portfolio](#)

- Developed a platform that processes and archives live streams, achieving low latency delivery (WebRTC: ~0.1s, DASH: ~7.4s, etc.).
- Technologies:** .NET, React, Wowza Streaming Engine, RBAC, SignalR, WebRTC, HLS, MPEG-DASH, PostgreSQL, Docker, Grafana, Alloy

KobiAI - AI-Based Business Management System - [Github](#)

- An operations platform that manages product, order, inventory, and customer processes for SMEs with AI support.
- Technologies:** Python, FastAPI, PostgreSQL, Redis, Google Gemini, Next.js, TypeScript, Zustand, SSE, Docker Compose.

Restaurant System - Restaurant Ordering & Management Platform - [Portfolio](#)

- Developed a platform integrating 5 core restaurant operations: ordering, table, menu, payment, and reservation management.
- Technologies:** Next.js, TypeScript, NestJS, Fastify, PostgreSQL, Redis, RabbitMQ, Prisma, Docker

ft_transcendence - Real-Time Gaming Platform - [Github](#)

- A real-time gaming, tournament, and social interaction platform built using a five service microservices architecture.
- Technologies:** TypeScript, Fastify, WebSocket, Web Components, Nginx, Docker, Microservices, i18n, OAuth 2.0, ELK Stack

Marketing Automation - Autonomous Ad Analytics Platform - [Github](#)

- Built a platform diagnosing Google/Meta ad anomalies with AI and reporting them to Slack, operating at a 95% confidence interval.
- Technologies:** Python, FastAPI, Pandas, NumPy, Google Gemini API, n8n, Docker, Pydantic

WebServ - HTTP/1.1 Web Server - [Github](#)

- A CGI supported server built from scratch using an event driven, non blocking architecture to handle concurrent network connections.
- Technologies:** C++, Socket Programming, I/O Multiplexing (poll/select), CGI, POSIX API.

EDUCATION

42 Turkiye - Istanbul - Software Development

October 2023 – January 2026

- In a project based, peer learning, instructor free software development education model, developed 15+ projects end to end under conditions equivalent to a real work environment. Researched and solved complex problems, underwent continuous peer code reviews, and gained professional software development experience by running collaborative development workflows in teams of 3-5.
- Technologies:** C, C++, TypeScript, Socket Programming, Multi-threading, Microservices, Docker, DevOps, Git, OOP

Istanbul Gelisim University - Management Information Systems

October 2021 – July 2025

- Completed a 4 year bachelor's degree as second in class with a 3.47/4.00 GPA; developed projects with a technical and strategic perspective in data mining, machine learning, and business intelligence within an interdisciplinary curriculum.
- Technologies:** Python, Java, SQL, Data Visualization, HTML, REST API, Front-End Development, Tailwind CSS, Data Mining, Machine Learning

AI & Technology Academy – Artificial Intelligence Module

January 2026 – September 2026

- Worked on project based AI application development throughout a 9 month intensive training program; developed generative AI based systems, designed multi step agent architectures, and gained a development discipline closely aligned with real product logic.
- Technologies:** FastAPI, LLM, Generative AI, LangChain, CrewAI, AI Agents, ReAct Agents, Local LLMs, RAG, Web Agent Integration

SKILLS

Languages

English: Intermediate (B1) – Turkish: Native

Technical Skills

- Programming Languages:** C, C++, Java, TypeScript, C#, Python.
- Backend Technologies:** ASP.NET Core, NestJS, .NET Web API, Fastify, REST API, JWT Authentication/Authorization, WebSocket, OAuth 2.0, RBAC, SignalR, FastAPI, RabbitMQ.
- Frontend Technologies:** React, Next.js, Tailwind CSS, i18n, TanStack Query, Zustand.
- Databases:** SQL, PostgreSQL, Redis, SQLite, Redis, Firebase, Supabase, Cloud Firestore.
- Automation & Data Processing:** n8n, Pandas, NumPy.
- DevOps, Infrastructure and Log Management:** Docker, Docker Compose, Nginx, CI/CD, Linux, TLS/SSL, Grafana, Loki, Alloy, Serilog, ELK Stack.
- Systems and Network Programming:** Socket Programming, Multi-threading, HTTP/1.1, TCP/IP.
- Software Architecture and Principles:** Microservices, MVC, Onion Architecture, Clean Architecture, OOP, Clean Code.
- Tools and Platforms:** Git, GitHub, Postman, Visual Studio Code, Antigravity IDE.
