Portfolio: menasy.me

Location: Istanbul
Date of Birth: 02.02.2000
E-mail: mehmetnasim42@gmail.com

I focus on software development, web technologies, and mobile programming. *"There is nothing I do not know, only things I have not yet learned."* With this mindset, I keep improving myself. I believe I have built a solid foundation with the technical knowledge and experience I have gained so far. My goal is to create innovative projects, add value to the teams I join, and do meaningful work in the industry.

You can visit my **Medium** for blog posts, and my **portfolio** for all my projects and detailed information. Working at your company would be a great opportunity for me. Thank you for your interest.

Education

- Istanbul Gelisim University – Management Information Systems / 2021 - 2025

Experience

- **42 Istanbul – Software Engineer / 09.10.2023 - 15.01.2026**

I worked on various software projects, from C/C++, multithreading, sockets, and microservices to full-stack web development with TypeScript.

- **Baykar Technology – Central Control Software Intern / 06.10.2025 - 27.12.2025**

I developed a full-stack live streaming platform using Wowza, .NET, and React.

- **Paka Technology – System Support Intern / 12.08.2024 – 23.09.2024**

I worked on IT infrastructure management and hardware/software support operations.

- **Tencent Holdings Limited – Server Technician / 01.04.2023 – 01.05.2023**

We completed server installation, rack placement, and cabling as a team.

Featured Projects

- **eSIMeco - Web:** A production-ready eSIM purchase platform built with Next.js.
- **Ft-transcendence - Web Game:** We rebuilt the classic Pong game as a team of four with modern web technologies.
- **Webserv - Web Server:** My teammate and I built a web server from scratch with C++ and socket programming, supporting HTTP/1.1 and NGINX-like behavior.
- **Inception - Microservice:** I built a web-based microservice architecture with Docker.
- **HesKit - Mobile:** I developed an employee management application using Java/SQL.
- **Central Health App - Mobile:** Kotlin, Firebase based appointment/prescription system.
- **Smart Guide - Mobile:** I developed and published an accessibility-focused contact application on the Play Store using React Native.

Programming Languages

- C (expert)
- Git/GitHub(expert)
- C#/ASP.NET (advanced)
- JavaScript/TypeScript (advanced)
- React/Next.js/React Native (advanced)
- C++ (intermediate)
- Java (intermediate)
- Kotlin (intermediate)
- SQL/PostgreSQL (intermediate)
- HTML/Tailwind/CSS (intermediate)
- XML (intermediate)
- Python (basic)

Areas of Interest

- Mobile Application Development
- Full-Stack Development
- Web Technologies

Programming Skills

- Object-Oriented Programming
- Multi Process and Multi Thread
- Docker/Microservice Architecture
- Monitoring and Log Management
- Component-Based Architecture
- Onion and MVC Architecture
- Asynchronous Programming
- Full-Stack Development
- Server Side Rendering
- REST API
- CI/CD
- Linux

Languages

- English (B1)
